## Overview

The hidden energy in the depths of the ground , became the interest of the communities all around the world , because of the recent and increased need for it , for this reason we in "YOSC " for oil services and construction , started our journey with hard , and actual labour to provide the various types of oil and construction services inside and outside Iraq territory . YOSC for oil services and constructions was founded in 2002 as a first class company according to The Iraqi Ministry of Planning Incorporation Certificate with a capital of 5 000.000.000 Iraqi Pound . YOSC has a variety of experience in oil and gas production facilities. Production facility experience includes gathering lines, compression, gas-oil separation, water treatment and injection, pigging, flaring, and storage.

## Overview

We help our clients unlock the full value of their energy assets. Over the years, we have always remained focused on our clients, operational excellence and supporting the market's changing needs, We hold ourselves to the highest standards and emphasize the importance of integrity in all we do. We believe that ethical standards are essential to the growth, health, and sustainability of our organization, employees, clients, and shareholders.

## Values

YOSC strategy is based on Client satisfaction achieved by meeting our requirements and those of the Client on time. Conformance to our Client's requirements and expectations is the responsibility of all YOSC employees. Quality Assurance System, procedures and practices are developed, reviewed and changed with the Participation of all employees in a continuous improvement effort. YOSC goal is to continue meeting world class standards throughout all the phases of a project for the mutual benefit of our Clients, our company, our employees and the country we operating in.

## MISSION STATEMENT

In the pursuit of delivering our projects in a safe and environmentally friendly fashion we have adopted safety & quality as our major principles, all by investing time and funds to strengthen our human resource base. while attempting to couple clients satisfaction with valuable contributions to local communities welfare

YOSC emergence as a pioneering regional player is the direct result of a set of values adopted by the company's management:

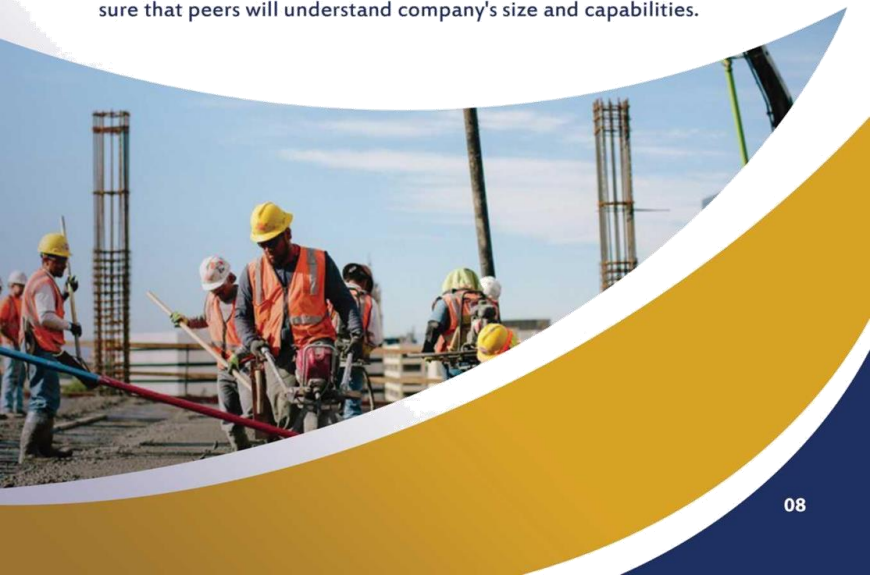

- performing all works in a safe and environmentally friendly manner
- Using the highest quality standards and client satisfaction as performance evaluation criteria

## MISSION STATEMENT

- Maintaining a world class project management system and a well organized site & operations management structure
- Allocating all needed human, financial and other resources to attain company goals. Respecting local cultures and traditions wherever the company operates.
- Investing time and funds to develop and expand the company's human resource base by training local workforce.
- Making sure that a projects' size will not distract from perfecting the smallest details that will ensure its overall success.
- Projecting corporate scale and expertise in the market place to make sure that peers will understand company's size and capabilities.

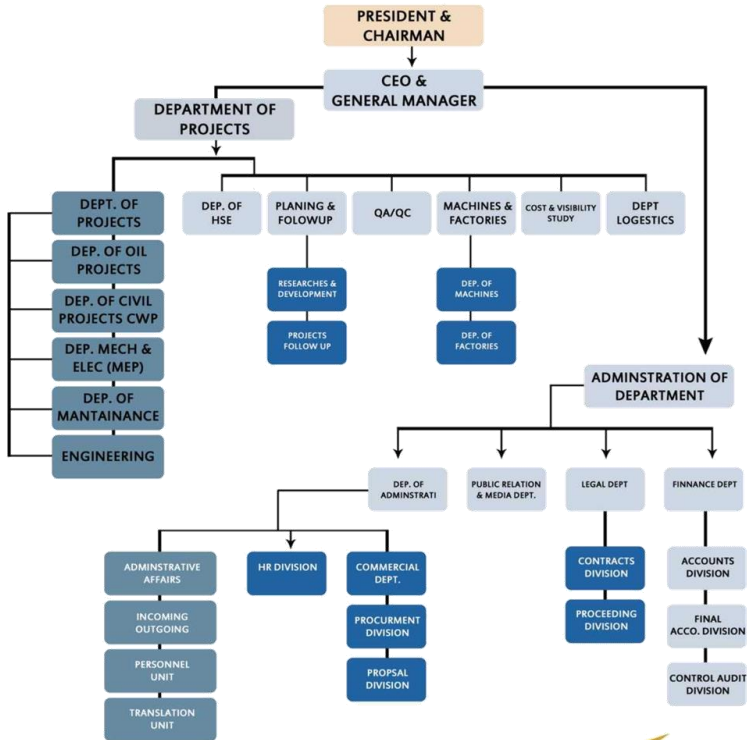

## WHAT WE DO

Throughout its years of operation, YOSC has shown a commanding performance in site construction management in addition to related engineering and procurement services and logistics. This proved to be YOSC main strength and the driving force behind its success and rapid growth

# Organization Chart

## CONSTRUCTION

Construction is YOSC stronghold and main contributor to its leading position.

At YOSC, work is never so urgent that it cannot be made following the strictest of HSE and quality standards. We have proved over time the ability to safely deliver high quality construction works in almost all construction disciplines, including:

- Mechanical Installations Works.
- Electrical & Instrumentation Works.
- Piping Fabrication, Installation & Testing Works.
- Pipelines Works
- Civil Works
- Structural Steel Erection Works.

## CONSTRUCTION AS A MAIN FOCUS

Through the implementation of a complete set of HSE, Quality Assurance, Quality Control and construction procedures, YOSC has effectively maintained a consistent and sustainable control over its operations. The implementation of said procedures, which have helped YOSC earning, ISO recognition, is subject to periodic audits, evaluation and improvement.

YOSC skilled workforce and highly qualified technicians from the foundation of its construction capabilities, which is further enhanced by a wide range of heavy construction equipment and a clear understanding of site Control requirements at management level. Planning plays a major role in the Construction management decision making process at YOSC. Mainly through weekly analysis of schedule updates leading to the early identification of potential setbacks and required corrective actions.

## CONSTRUCTION AS A MAIN FOCUS

Equally important is the efficient interaction between YOSC various site departments, namely HSE, QC, technical office, construction and project controls.

This offers a valuable advantage towards attaining YOSC and Clients' objectives.

YOSC has proven its capability and flexibility to perform complete construction works or more specific subcontracts on a variety of Energy project, and has shown its capacity to undertake several of these contracts simultaneously

YOSC has been successful both as subcontractor to major EPC companies across the globe and as main contractor to Projects owners whether on its own or through partnerships and consortium

## QUALITY

"Quality, Health, Safety and Environment are important characteristics of the Company's activities, and hence are the major base on which Company's image is built'. YOSC is certified ISO 9001:2000, and pays a systematic and uncompromising attention to Safety, Environment and Quality. In order to keep a spotless record in these three areas, YOSC has developed comprehensive HSE and quality manuals and procedures including implementation and auditing systems. YOSC has also exerted relentless efforts to make sure its employees are trained to the highest safety and quality standards.

Quality of work is a basic strategic principle that has been adopted by YOSC with a focus on satisfying clients' needs through delivering a world class standard of effectiveness and efficiency in all the services it provides.

## QUALITY

At YOSC, we give the highest priority to understanding Client requirements & objectives, and to matching these with the requirements of YOSC HSE Policy & Quality Management System, in addition to Project Quality Plan. All while keeping an eye on Engineering/Procurement/Construction requirements.

This understanding serves as the basis for YOSC Project specific strategy, through:

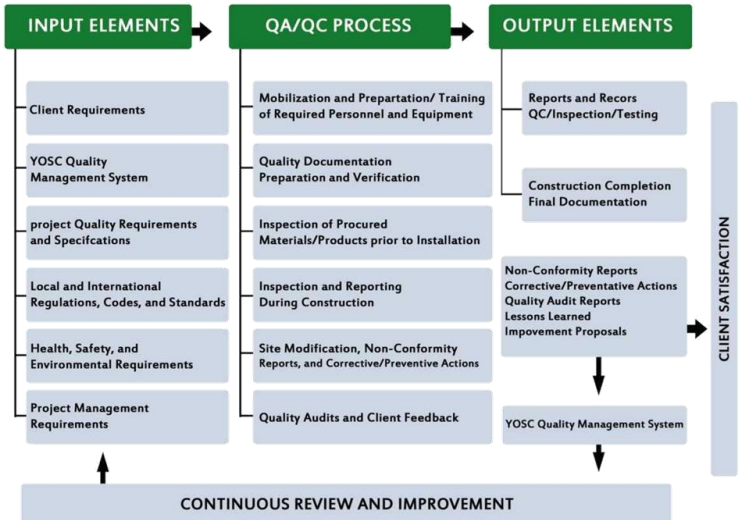

- The mobilization of adequate resources, including a suitable induction of all Project participants
- The preparation & verification of Project documentation.
- The management of site modifications, NCRs and Corrective /Preventative Actions.
- The undertaking of periodic audits.

For a given Project, the above will produce the following:

- QC/Inspection/Test reports & records.
- Final Construction Completion documentation
- NCR and Corrective/Preventative
- Actions Registers Quality Audits Reports.
- Lessons learnt.
- Improvement proposals.

These are used to enrich YOSC Quality Management System through it "Continuous Improvement" process.

## Quality Assurance / Quality Control Process

## HEALTH , SAFETY & ENVIROMENT

It is YOSC policy to operate in a manner that would protect the health, safety and well-being of people, local communities and the country where it is operating. YOSC is committed to achieving the highest HSE standards in the execution of its business, from planning and engineering phases through construction on site. YOSC has clear goals to continuously improve toward, and try to maintain, ZERO injuries and occupational illness

We also pursue management procedures that guarantee dedication to safety and occupation health.

### SITE SAFETY RULES

**Safety Helmet Must Be Worn**

**Eye Protection Must Be Worn**

**Ear Defenders in Designated Areas**

**Wear Gloves for Manual Handling Tasks**

**Hi Visibility Clothing Must Be Worn**

**Safety Boots Must Be Worn**

**No Children & Unauthorised Persons**

**All Drivers & Visitors Must Report To The Site Office**

## HEALTH , SAFETY & ENVIROMENT

YOSC personnel recognize that commitment to safely is a condition of employment, and understand that they are responsible for their own safety and for the safety of those around them. Respecting and caring for the environment in which YOSC operates is achieved by minimizing the environmental impact of its activities It is also achieved by operating in a responsible manner which reduces the risk of environmental pollution and by fostering and encouraging open communication on company environmental performance with interested parties.

This process raises awareness about the impact of YOSC activities vis a vis government, clients, and other interested parties resulting in balanced environmental expectations.

## STAFF AND EQUIPMENT

The company owns all the advanced equipment necessary for the execution of the pipelines to the fullest (HDD, Side booms, Internal Clamps, Boring Machine and Bending Machine, etc.) YOSC pipeline management has over 5 years of experience in servicing these industries on a Design and Build, Engineering, Procurement, Construction, and Commissioning (EPCC) basis.

The company has a highly experienced and qualified professional team of engineers, which includes technical staff, senior project managers, qualified engineers, quantity surveyors, and certified welders.

Due to the nature of the work undertaken, the company has very high standards and guidelines of Safety Management and HSE Systems. YOSC carries out regular monitoring of all its Systems and Operating Procedures to ensure that all works undertaken or materials supplied through its approved major suppliers are carried out in full compliance with the very latest legislation and Oil & Gas recommendations.

## STAFF AND EQUIPMENT

In line with this Total Quality Commitment the company has in-house Quality Assurance Systems to monitor and control all aspects of our work including materials, welding standards, pipework assembly, testing and commissioning.

The company has a human resource base of more than 3000 qualified and extensively experienced person- specializing in construction activities, with focus on Oil Gas, and power plants Management includes more than 100 persons most of them bilingual , allowing 200 for efficient working relationship with clients from different parts of the world. Privately owned modern construction equipments YOSC less than five years old); including more than 100 cranes with up to 300 tons capacity, add to its already advantageous position.

## YOSC Capabilities Details

### - CIVIL WORKS AND CONSTRUCTIONS:

(foundations, buildings/offices, paving, soil works and steel structure works.)

- Provide and install prefabricated buildings , Demolition Services , Earthworks & Electrical Systems  
Housing Complexes , Recreation Facilities , Retail Buildings, Roads. , Warehouses & Hangars

**- Soil Works:** Soil works are part of engineering works which are produced via moving or handling parts of the soil surface, i.e. the soil may be moved to another place formed into a preferred shape for some purpose. Much of these works need machine digging and fill or backfill. They include digging works, acts of cutting rocks and reclamation. Usually, heavy construction equipment is used due to the amounts of materials to be moved. They are done via heavy equipment machines such as diggers, excavators, compactors, winches, forklifts, trucks, trailers, tower winches, air compressors and engraving machines. There are many types of soil works in our company. One of them is normal soil works which contain roads, boardwalks, dams, embankments, channels. Another type is land grading; to rearrange the features of the location or to make the slopes steady.

## YOSC Capabilities Details

- **PIPELINE AND PIPING:** We specialist in the construction of oil pipelines, oil track lines, flow lines, pipelines, oil track lines, flow lines, piping fabrication and installation, water injection pipeline and piping, wellheads piping, manifolds fabrication and installation .

Yosc is classified as one of the best local companies competent in the field of pipeline construction. YOSC Pipeline Construction is focused on providing high value-added services to meet the civil-mechanical needs of the process construction industries including Oil & Gas processing facilities.

## YOSC Capabilities Details

### - TANKS ERECTION:

We have accumulated experience in erection maintenance EPC tanks including fixed roof and floating roof tanks.

### - Floating roof and Fixed Roof Tanks:

YOSC has the experience of constructing floating roof and fixed roof tanks for degassing stations, oil refineries, and storage/export depots. The company possesses all the technical knowhow, the material and equipment needed to establish high quality tanks based on the International Standard API 650 .

## YOSC Capabilities Details

### - ELECTRICAL WORKS :

- Installation of electrical substations
- Extension of over-head and underground power lines and cables .
- installation of electrical poles and towers
- Maintenance and repair of transformers, substations, poles, lowers, power lines ,and control panels
- installation and rehabilitation of electrical lines and network
- Electrical power production transmission and distribution Automation
- SCADA and telemetry systems
- industrial plants PLC based control systems

## YOSC WORK EXPERIENCE:

### - OIL AND GAS STATIONS:

We have demonstrated experience in installation and maintenance of oil and gas stations in various forms (degassing station, dehydration station, water injection station gas compressor station and pumping stations)

**YOSC has the experience of constructing various types of oil and gas stations as the following:**

**A – Degassing station**

Dry oil banks and wet oil banks installation

Salt processing units

Vessels installation

Piping fabrication and installation

Pumps installation

Manifolds fabrication and installation

**B** – Gas compressor station  
Gas compressor installation  
Gas blower installation  
Gas air cooler assemblage and installation  
Vessels installation  
Piping fabrication and installation  
Pumps installation  
Flare Sticks unit installation

**C** – Gas treatment unit (GTU)  
TEG- Gas contactor tower installation  
TEG reboiler installation  
TEG air cooler installation  
Vessels installation  
Piping fabrication and installation  
Pumps installation  
Flare Sticks unit installation

D – Also we have the expertise in the construction of the following stations

Waste Water Treatment unit

Pigging Station

Pumping Station

Water injection Station

Slug Catcher

Water Treatment Unit

#### Steel structure works

YOSC has the experience of fabricating and constructing Various types of steel structures works as follows:

Pipes rack works

Steel pipes supports

Shelters

Warehouse
